New Life Academy

Vision

To develop tomorrow's Christ-centered leaders today.

Mission

Our mission at New Life Academy is to educate and energize each student to impact their world for Jesus Christ and to reach their full potential in scholarship, leadership and service out of love for God and one another.

Motto

Learn with Honor. Lead with Courage. Serve with Compassion.

Core Values

- Pursue excellence in educating and preparing students for life
- Teach and model an authentic Christian life and worldview
- Treat others as individually valued and uniquely created
- Create vibrant relationships with students and families
- Provide a transformative educational experience for an exceptional value

Portrait of a Graduate

If you know a tree by its fruit, our most powerful example is our graduates. We exist to unleash a generation of believers shaped by Jesus' teachings to pursue excellence in all things for His glory, moving toward a hurting world with His grace and mercy. A New Life Academy graduate will be

- Authentic Christ Followers
- Spirit-Driven Individuals
- Accomplished Learners And Mindful Doers
- Agents For Positive Change
- Wise Leaders And Discerning Followers

New Life Academy Upper School Course Catalog

2019-20

Statement of Faith

Christian education is a partnership. Unity in that partnership is an essential part of being consistent and effective in our mission to educate and energize each student to impact their world for Jesus Christ. Below is our statement of faith; written to help you understand what we believe and therefore teach.

The Word of God

We believe that the Bible is the Word of God, fully inspired and without error in the original manuscripts, written under the inspiration of the Holy Spirit, and having supreme authority in all matters of faith and conduct.

The Trinity

We believe that there is one living and true God, eternally existing in three Persons; that these are equal in every divine perfection, and that they execute distinct, but harmonious offices in the work of creation, providence, and redemption.

God the Father

We believe in God the Father, an infinite personal Spirit, perfect in holiness, wisdom, power, and love. We believe that He concerns Himself mercifully in the affairs of men, that He hears and answers prayers and that He saves from sin and death all who come to Him through Jesus Christ.

Jesus Christ

We believe in Jesus Christ, God's only begotten Son, conceived by the Holy Spirit. We believe in His substitutionary atoning death, bodily resurrection and ascension into heaven, perpetual intercession for His people, and personal visible return to earth.

The Holy Spirit

We believe in the Holy Spirit who came forth from the Father and Son to convict the world of sin, righteousness, and judgment and to regenerate, sanctify, and empower all who believe in Jesus Christ. We believe that the Holy Spirit indwells every believer in Christ, and that He is an abiding helper, teacher, and guide.

Regeneration

We believe that all men are sinners by nature and by choice and are, therefore, under condemnation and that there are no good deeds that a person can do to free himself from condemnation. We believe that those who receive Jesus Christ as Lord and trust in Him by faith as the only way to salvation are regenerated by the Holy Spirit.

The Last Things

We believe in the personal and visible return of the Lord Jesus Christ to the earth and the establishment of His Kingdom. We believe in the resurrection of the body, the final judgment, the eternal peace and joy of the righteous, and the endless suffering of the wicked.

The Church

We believe in the universal church: a living spiritual body of which Christ is the head and all regenerated persons are members. We believe in the local church: consisting of a company of believers in Jesus Christ, baptized on a credible profession of faith, and associated for worship, work, and fellowship. We believe that God has laid upon the local church the primary task of giving the gospel of Jesus Christ to a lost world.

New Life Academy Upper School Course Catalog 2019-20

Community Service Hours:

We strive at New Life Academy to develop students that have a growing and personal relationship with Jesus Christ. We are called as believers to be the hands and feet of Christ. Service hours gives New Life Academy students a distinct advantage to learn the heart of service. Community service provides students the opportunity to find a passion for giving back in the areas they live in and the world around them.

All Christian service hours will be based on the principle in Mark 10:45 which states, "For even the Son of Man did not come to be served, but to serve, and to give his life as a ransom for many." Simply stated, the type of service that you will be required to do will involve giving of your time and talents.

Students in grades 9th-12th can earn service hours in a variety of ways and can also earn them during the summer, weekends and other opportunities. (Mission trips, church volunteering, community service and more). Students will have access to a link in Schoology where they can log their hours. Upper School Community Service Hour Requirements are 15 hours per year for 9th & 10th grades and 20 hours per year for 11th and 12th grade.

Citizenship Code

At New Life Academy we put a strong emphasis on academics and character. The Citizenship Codes are a tool to communicate, not only academics on the report cards, but how a student is doing as a member of our school community.

E – Excellent

- Consistently displays a Christ-like attitude
- Goes above and beyond to encourage and help classmates
- Shows excellent participation skills, by both sharing and listening to others' remarks
- Demonstrates strong leadership skills

G – Good

- Respectful to the teacher and classmates
- Consistently displays a positive attitude
- Comes to class on time, properly attired, and prepared
- Remains respectful and attentive during instruction
- Willingly participates in learning activities

S – Satisfactory

- Generally shows respect to their teacher and classmates with few exceptions
- Shows a positive attitude most of the time
- Is prepared for class but is occasionally late, or out of dress code
- Participates in classroom activities and learning with some reminders

N - Needs Improvement

- Attitude and behavior negatively impacts class or disrupts learning
- Is disrespectful to teacher
- Discourages or makes unkind remarks to classmates
- Is occasionally late, unprepared for class, or out of dress code
- Requires repeated correction

U – Unsatisfactory

- Unwilling to cooperate or benefit from correction
- Repeatedly demonstrates a negative attitude and pattern of behavior
- Is a continual distraction to the learning process
- Is consistently late, unprepared for class, or out of dress code

Citizenship Codes Policy

- A New Life Academy student receiving an N will result in conference with the principal. The conference may include parents, but a communication to the family will come from the Principal.
- A New Life Academy student receiving a U or more than one N will be ineligible for extra-curricular and athletic participation for a minimum of two weeks. In addition, they will be required to have a conference with the principal and at least one parent in attendance.

Ineligibility includes all extra-curricular activities. Citizenship codes will also be used to evaluate a student's participation in other school leadership, field trips or travel opportunities. (Sports, Drama, Clubs, Athletic Captainship and leadership positions at the school, National Honor Society, Student Council etc.)

New Life Academy Upper School Course Catalog 2019-20

Grading Scale

Assignments, quizzes, tests, reports and projects are evaluated according to the following grading scale:

100 - 94	4.00	A	76 - 73	2.00	C
93 - 90	3.66	A-	72 - 70	1.66	C-
89 - 87	3.33	B+	69 - 67	1.33	D+
86 - 83	3.00	B	66 - 63	1.00	D
82 - 80	2.66	B-	62 - 60	0.66	D-
79 - 77	2.33	C+	59 - 0	0.00	F

Weighted GPA vs. Unweighted GPA

At New Life Academy, students have the opportunity to earn weighted grade points by taking honors, College in School (CIS) and Advanced Placement (AP) level courses. Honors courses are accelerated, more challenging versions of regular classes, and Advanced Placement (AP) courses are considered college level coursework. Both require students to learn at a faster pace, with greater depth, and allow students the opportunity to earn an extra grade point. Therefore, students earning A's in honors and AP classes may begin to see their GPA increase above the 4.0 mark because they earned an extra grade point and were also successful in their other coursework.

Failed Courses/Credit Recovery

If a student fails a semester or full-year course, that "F" remains on the transcript and the "F" figures into the student's grade point average (GPA). If the student makes up the credit lost by passing a summer school course, retaking the course, or taking an online credit recovery course, the new grade will be placed on the student's transcript. This new grade will factor into the GPA. The old grade of "F" will remain on the transcript, but it will not be factored into the GPA. This policy only applies to courses that have been failed.

PSEO

New Life Academy offers a hybrid PSEO plan where students can take PSEO credits while remaining on campus. PSEO courses are either taught onsite by a PSEO certified teacher or online through our partnership with University of Northwestern, St Paul. PSEO earns dual credit and will count towards your GPA. Be sure to work with our Academic, College and Career Department to understand if PSEO is the right option for you. Wisconsin has recently started a similar program for WI residents. If you are interested in this program, please see the Academic, College, Career office.

If a New Life Academy offers a class similar to a PSEO class, students are required to first take the New Life Academy class. If there is a schedule conflict with the NLA offered class, please contact the Academic Counselor.

New Life Academy Upper School Course Catalog 2019-20

Academic Support

NHS Homework Help

New Life Academy provides homework help through our National Honor Society members. If you would like support, watch for opportunities on Schoology or contact the Academic, College and Career Department.

Writing Center

The Writing Center is open for all secondary students to receive help in any stage of the writing process, from brainstorming, through research and idea development, all the way to final proofreading. The NLA Writing Center is coordinated by Mrs. Kortuem and staffed by students during FLEX time. Students are encouraged to request an appointment to ensure they will be matched with a tutor, and if requested, his/her teacher can be alerted that he or she visited the writing center for their assignment. Students can sign up for an appointment by visiting Mrs. Kortuem's classroom.

Graduation Requirements

A. To receive a New Life Academy diploma, students must successfully complete 25 credits. Students must carry a minimum of six credited courses per semester. Semester classes are 0.5 credit and full year classes are 1.0 credit. Study hall receives no credit.

B. Required Credits for a New Life Diploma

- 4 English credits
- 3 Mathematics credits
- 3 Social Studies credits*
- 3.5 Science credits*
- 2 World Language credits
- 4 Bible credits (or 1 Bible credit required for each year of Upper School Attendance)
- 1.5 credits PE/Health
- 1 Art credit
- 0.5 Technology credit

**Starting with Class of 2022. Students prior need 3.5 Social Studies credits and 3 Science credits*

C. Diplomas are issued when the following criteria are met:

- Academic Criteria
- Community Service hours met (goes into effect for the 2019-20 school year)
- No outstanding student account balance
- No pending disciplinary action

New Life Academy Upper School Course Catalog 2019-20

Bible***	4 credits	0 credits	0 credits	0 credits
Electives	2.5 credits (1.5 must be academic)	1 credit	1 credit minimum	Varies

* Language must be the same language

***Starting with Class of 2022. Students prior need 3.5 Social Studies credits and 3 Science credits*

***Students transferring into NLA are required to have 1 Bible credit for each year attended.

Note: College admission requirements vary according to each individual college or university's policies. Be sure to consult the specific admission requirements for the colleges and/or universities that your student desires to attend. These recommendations are meant to serve as guidelines. Guidelines will also depend on the College Major (ex. science and engineering majors will look for 4 credits in both science and math).

New Life Academy Upper School Course Catalog 2019-20

Daily Schedule

New Life Academy utilizes a modified block schedule in Upper School. We've modified the class schedule so that two days a week we have longer blocks of classes to allow for deeper investigation of topics and more time on experiments and projects. On the other three days, we provide students a FLEX time mid-morning.

Monday	Tuesday	Wednesday	Thursday	Friday
1st Hour 8:00 - 8:48	1st Hour 8:00 - 8:48	1st Hour 8:00 - 9:30	5th Hour 8:15 - 9:45	1st Hour 8:00 - 8:48

Community Groups

New Life Academy's community group program is a central component to the mission of New Life Academy. Community Groups are designed to equip and develop our students to be Authentic Christ Followers, Spirit Driven Individuals, Agents for Positive Change, Wise Leaders and Discerning Followers, and Accomplished Learners and Mindful Doers.

By setting aside time for students to develop vibrant relationships and to learn how to treat others as individually valued and uniquely created, Community Groups is just one more way that NLA equips tomorrow's Christ-centered leaders.

Community groups are assigned within their grade. Groups are made up of 10-15 students of a single gender. Teachers and faculty will serve as Community group advisors. Community groups meet twice a month and have the following goals:

- Culture building through relationships and leadership development
- Goal setting
- Academic Guidance and Advocacy

New Life Academy Upper School Course Catalog 2019-20

FLEX

Flex Time is a 30-minute period offered three times a week that allows students to get extra academic help, participate in clubs / activities and/or connect with staff and other students. The goals of FLEX time are :

- To promote academic equity by giving all students a chance to have individualized access to teachers and resources during school hours.
- To give students the opportunity to experience different opportunities in unique areas of interest.
- To give the school leadership and teachers the time to meet with grade levels, promote community and training.
- To develop students spiritually, mentoring and discipleships opportunities, leadership development
- To provide opportunities for class unity

Academic, College and Career Planning

Our goal is to maximize the success of each student by removing learning obstacles and navigating social and emotional challenges so they can thrive at NLA. We spend time getting to know each student so they have the tools they need to succeed. We provide a supportive environment to help students identify paths in academics and activities to steer them towards their college and career goals.

College Planning

Planning for college can be an overwhelming task for students and their parents. We recognize that each student is unique and we strive to help them identify their strengths, values and interests. Knowing the competitive nature of admissions at many colleges, we coach our students on how to best prepare and present their achievements.

College Planning Tool: Naviance Family Connection

Family Connection from Naviance Succeed is a comprehensive website designed for our students and parents that assists in making decisions about courses, colleges, and careers. Family Connection will allow parents and students to:

- Get involved in the planning and advising process – Build a resume, complete online surveys related to college & career planning, and manage timelines, deadlines, and application materials during the college admissions process.
- Research colleges – Compare GPA, standardized test scores, and other statistics to actual historical data from our school for students who have applied and been admitted in the past.

Parents and students can log in at: <https://student.naviance.com>. If you need help with your login, please contact the Academic, College and Career office.

National Honor Society (NHS) Membership

National Honor Society recognizes Sophomore, Junior and Senior students who demonstrate outstanding ability in four areas: scholarship, leadership, service, and character. NHS members are required to serve the New Life community by assisting other students in their academic and social development by providing homework help for at least one student per semester during flex time, before or after school. The academic qualifications for NHS membership are:

- Students must take at least two advanced level courses (denoted *) each semester
- Maintain a cumulative GPA of 3.5 or above
- Be in good standing in accordance with the Citizenship Code policy

New Life Academy Upper School Course Catalog 2019-20

4-Year Pathways and Sequences

Students can choose courses that fall into a regular academic track or an advanced (Honors, AP) academic track. Many courses can be mixed. The chart below provides a guideline if a student aims to follow one track throughout Upper School. Refer to each Subject section for the full range of courses, descriptions, and NHS qualifying courses. **Some courses may not be offered every semester or are subject to change based on demand.**

New Life Academy Upper School Course Catalog 2019-20

Arts

Visual Arts, Musical Arts, Theatre

Art is not something separate from life, but something at the heart of life which celebrates the fact that we are creator children of a Creator God." Steve Turner

AP Art History*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12. Prerequisite: Any AP class, Art, or History Class, with a grade of B or higher and/or minimum cumulative GPA of 3.0.

Can fulfill 1 credit for Fine Arts or 1 credit for History.

Course Description: AP Art History is designed to provide the same benefits to high school students as those provided by an introductory college course in art appreciation or art history. This course will educate and enhance understanding and enjoyment of architecture, sculpture, painting, and other art forms within historical and cultural contexts and increase growth in understanding God as the Creator God and gifts and talents in the arts are given from God. In this course, students examine major forms of artistic expression from the past and present and from a variety of cultures. Students will learn to look at works of art critically, with intelligence and sensitivity, and to articulate what they see or experience. AP Art History will help students develop visual literacy, oral and written skills of comparative analysis (emphasizing descriptive and analytical writing about works of art and architecture from many cultures and time periods), and the understanding of those works in historical and sociological contexts (politics, religion, patronage, gender, function, ethnicity, and formal stylistic observations). An optional AP exam may be taken for an additional fee. Students scoring a 3 or above on the exam (1-5 possible) receive college credit, advanced placement, or possibly both, at certain colleges/ universities. AP Art History can be applied (if passed and approved by college) as a general art appreciation course, humanities course, or Art History course and possibly can count for two courses.

Studio Art

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: None

Course Description: Studio art is an introductory foundation art course for students wanting to develop and improve basic art skills and knowledge of artists, mediums, techniques, and art processes. Emphasis is placed on the Elements of Art and the Principles of Design in order for students to create expressive, but well-organized works of art. This course is designed to give students experiences into creative problem solving using a variety of techniques and media, as well as the study of art history and art criticism to understand what art is and how art is created, while discovering their God-given abilities to create. This course is modified each semester so students may take multiple semesters.

Painting & Drawing

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12

Prerequisite: Studio Art recommended

Course Description: This class will explore and introduce students to drawing and painting concepts, processes, and techniques using a variety of media, including pencil, pen, ink, watercolor, acrylic, and oil while working with a wide and challenging range of subject matter.

New Life Academy Upper School Course Catalog 2019-20

Graphic Design I

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12, Prerequisite: An art class or technology class recommended.

Can fulfill a .5 credit of Fine Arts or .5 credit for Technology

Course Description: The ability to visually solve problems is what defines graphic design, and its effectiveness is measured by a designer's ability to convey the message they seek to send through a variety of channels including logos, posters, advertisements, website, package design, branding material, etc...In this class we will examine these platforms and others, as well as look at the history, theory, and the tools that can be used to achieve effective graphic design. This course will introduce students in the basic language and principles of Graphic Design. Students will learn the basics of good design by using Adobe Illustrator and Photoshop software applications, as well as illustration to create various designs. This is a great class for those pursuing Marketing, Design or Visual Arts. Students will grow in understanding of God as the Creator God and how art, imagination, and creating is worship to God.

Graphic Design II

Length of Class: 1 semester, .5 credit

Open to Grade(s): 10, 11, 12, Prerequisite: Graphic Design I with a 3.0 or higher

Course Description: In this class you will continue to examine the history, theory, and the tools that can be used to achieve effective graphic design. Students will use the language and principles of Graphic Design to implement learning into successfully designed projects and art. Students will expand their knowledge of Adobe Illustrator, Photoshop, and InDesign software applications, as well as illustration to create various media. Students will also help guide, instruct, and critique Graphic Design I students in order to build a creative environment which fosters innovation and encouragement to have all students develop the process of communicating information through creative applications. Students will grow in understanding of God as the Creator God and how art, imagination, and creating is worship to God.

Digital Photography I

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: none

The Digital Photography course can fulfill a .5 credit for Fine Arts or .5 credit for Technology

Course Description: Digital Photography will look into the world and artists of digital photography. The class will be split up into 5 sections: History of digital photography, learning how to use your camera, learning how to use Photoshop/Lightroom, 8-10 photography projects based off of 8-10 styles of photography and a final project. Students will be graded based on effort, execution and planning, as well as weekly exercises, attendance and participation. We will also take a field trip at the end of the semester to exercise all the techniques that have been learned. Required: Students must provide their own DSLR camera.

Digital Photography II

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: Digital Photography I

The Digital Photography II course can fulfill a .5 credit for Fine Arts or .5 credit for Technology

Course Description: Digital Photography II is a continuation of what is learned in Digital Photography I.

New Life Academy Upper School Course Catalog 2019-20

Intro to Filmmaking

Length of Class: 1 semester, .5 credit Open to Grade(s): 9, 10, 11, 12 Prerequisite: none
The Intro to Filmmaking course can fulfill a .5 credit for Fine Arts or .5 credit for Technology

Course requirements:

A camera with video capabilities. Any will do. It is preferable that it is one with a manual focus. A phone will work.
A portable external hard drive (at least 350 GB)
An SD card with at least 16 GB
Headphones

Course Description: In this course, students are introduced to the basics of filmmaking. With a focus on technical and narrative structure, students produce short narrative and documentary projects through individual and group work.

Topics include basic cinematography, camera shots and movements, basic light techniques, editing techniques, and introductory sound design. Students will acquire hands-on experience in digital film production.

Sculpture

Length of Class: 1 semester, .5 credit
Open to Grade(s): 9, 10, 11, 12 Prerequisite: Studio Art recommended

Course Description: The course is designed to give an introductory experience to 3D/sculpture as part of visual arts using various mediums such as wood, clay, metal, plaster, and paper. Students will explore movements, works, and artists within sculpture, architecture, industrial design, and monumental design while discovering God-given abilities in a fun and challenging atmosphere. This is a great class for students who need Fine Arts credits but feel they are not artistically inclined.

Worship Arts

Length of Class: 1 semesters, 1 credit
9th and 10th graders will receive a Fine Art credit for Worship Arts
11th and 12th graders can receive Fine Art or Bible credit (1 credit max) for Worship Arts.
Open to Grade(s): 9, 10, 11, 12
Prerequisite: Class acceptance by audition and/or interview

Course Description: The primary focus of this course is to prepare the weekly worship experience for NLA chapel, both musically and technically. Our response to the Gospel message naturally leads us to worship. We will focus on the act of worship – why we sing together in chapel, how we worship God in our individual lives, and what the Bible says about worship. Studying Psalms (book of praise), we will learn about different types of psalms and critically examine current worship songs that we sing today. This is an opportunity for students to use the gifts the Lord has given them and have weekly ministry opportunities.

Concert Choir

Length of Class: 2 semester, 1 credit
Open to Grade(s): 9, 10, 11, 12. Prerequisite: Audition and consent of the director

Course Description: In order to be successful, any choir must demand excellence from each individual member. The individual contribution to such a group must reflect a measure of self-discipline and a desire for growth towards a positive attitude, excellence in skill performance, and useful knowledge of the subject matter. This talent comes to each one of us from God and we must give Him the credit for our musical ability. Highlights of High School Choir are Choir Tour every other year, singing at the Mall of America, MSHSL Large Contest, and singing at the St. Paul Cathedral. **This is a Choir Tour year

New Life Academy Upper School Course Catalog 2019-20

Morningstar

Length of Class: 2 semesters, .5 credit

Open to Grade(s): 9, 10, 11, 12

Prerequisite: Audition, consent of the director, two years of Choir or current enrollment in Choir.

Course Description: Morningstar is a performance based, ministry oriented, touring, music/drama group. Students must audition in the spring prior to the year they wish to participate. The class meets three mornings a week before school to prepare for presentations at New Life chapel services as well as at other schools, churches, and places where invitations are extended. Highlights of Morningstar are singing at Town Square in St. Paul at Christmas time, MSHSL Large Competition; IDS Tower, and the Mall of America with a Morningstar tour every other year.

Drama-Acting

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: MS Drama, Musical Theatre, or being in an NLA production

Course Description: This course is a comfortable way to learn and develop skills in creative dramatics, acting, and directing. Units of study will involve basic to complex areas of acting including emotional development, physical movement, and improvisation. This course is an exciting way to develop poise in front of a group while experiencing the thrill of involvement in theater. This course will also help develop communication skills as the students direct their peers in an ensemble setting.

Band

Length of Class: 2 semesters, 1 credit

Course Description: Band is offered to students committed to performing in small groups and large ensemble all while developing skills on their instrument. The band performs two main concerts at NLA, one at Christmastime and the other in the spring. Other performances or activities are also planned throughout the year, such as performing at the Mall of America or visiting Orchestra Hall.

Pep Band

Length of Class: Full Year Extracurricular

Students in 6-12th grade are welcome to be a part of this ensemble that plays for multiple home sporting events starting in the Fall through the Winter. We play upbeat, energetic pieces to keep the teams' spirits high and the fans cheering! We have rehearsals before school or after once a week during the Fall, with occasional rehearsals during the Winter. Students get free admission to the games.

New Life Academy Upper School Course Catalog 2019-20

Bible Courses

The story of the Bible is the most exciting story ever told. It is the story of a God, His people and the promise of a king who would bring peace and life to all people. The message of the Bible is that Jesus is this promised king, who died in our place, making peace and securing the future of all who believe. Through studying the Bible, students are able to see the world through the lens of Christ. Students seek God's good intention for the world, an understanding of how things went wrong, how Christ set things right, and a picture of what is to come

Bible 9 – Introduction to the Bible

Length of Class: 2 semesters, 1 credit
Prerequisite: None, Open to Grade(s): 9

Course Description: Students will study the entire Bible following the person and character of Christ from Genesis to Revelation. This course is a study of God's plan for redemption. The objective of the course is to learn God's character, plans and purposes through study of characters, major events and flow of the text to a personal relationship with Christ.

Bible 10 - The Mission of God

Length of Class: 2 semesters, 1 credit
Prerequisite: Intro to the Bible, Open to Grade(s): 10

Course Description: In 10th grade, the focus is on learning about the Gospel of Jesus Christ. Throughout the year, students are asked three questions: What is the Gospel? What does the Gospel change in us? How do we take the Gospel into the world? The course focuses on inductive study through the books of Acts and Ephesians for the first semester. The second semester follows an outline of the book The Gospel in Life by Timothy Keller as the students interact with the Gospel in various aspects of life. Throughout the school year, an emphasis is placed on cultural and world engagement for and with the Gospel of Christ. The students learn that it is through the Gospel that lives are changed and God's plan for the world is brought into focus.

Christian Thought

Length of Class: 1 semester, .5 credit
Prerequisite: The Mission of God, Open to Grade(s): 11, 12

Course Description: Christian Thought is an introduction to Christian theology, church history, and the Christian worldview. This course is designed around reading and responding to "classic" Christian writings on a variety of important theological and devotional topics. The goal of this course is to develop a way of thinking and understanding that makes it possible to engage truth and culture with the message of Christ.

CIS Bible*

Length of Class: 1 semester, .5 credit
Prerequisite: The Mission of God with a grade of B+ or higher and/or a minimum cumulative GPA of 3.0. Open to Grade(s): 11, 12

Course Description: CIS Bible, a collaboration with Bethel University and offered as Bethel University's Bible 101, taught on the New Life campus. This one-semester course covers Genesis through Revelation. CIS Bible examines the books of the Bible in their chronological flow through history. The course is an overview of the entirety of scripture with an emphasis placed on interpretation, purposes, messages and themes. The goal is to provide an overall understanding of the messages of scripture and the tools to interpret and apply God's word to the individual's life. Please Note: There is an additional college credit fee of approximately \$195 required for this course. In addition to high school credit, students will receive three Bethel University college level credits.

New Life Academy Upper School Course Catalog 2019-20

Introduction to Ministry

Length of Class: 1 semester, .5 credit

Prerequisite: The Mission of God, Open to Grade(s): 11, 12

Course Description: This course will introduce students to various types of ministry and assist them in identifying their gifts. In addition, it will help equip students to be the leaders of the church that this world desperately needs. The goal is for students to start to look for and find ways to use what they have learned and the ways they have been gifted. The course is very practical and dynamic in nature. It is the perfect fit for the student that is looking for ways to get involved and use their talents for Christ.

Principles of Biblical Interpretation

Length of Class: 1 semester, .5 credit Open to Grade(s): 11, 12

Course Description: This course is a study of the interpretative principles involved in discerning the meaning of the biblical text. Students will engage with the various genres of scripture so that they may interpret passages within their historical context and apply them for today. The course requires a hands-on approach that involves the student in the research and interpretation of various passages of the Bible.

- Course Materials: How to Read the Bible for All it's Worth by Gordon D. Fee and Douglas Stuart and Hard Copy of The Bible (preferably ESV Bible)
- Course Units: Introduction to Interpretation, Interpretation Need, Tools for Interpretation, The Epistles, Old Testament
- Narrative, The Book of Acts, The Gospels, The Parables, The Law, The Prophets, The Psalms, Wisdom Literature, Revelation, The Centrality of Christ, The Culmination of Scripture, Final Project

Worldviews

Length of Class: 1 semester, .5 credit Open to Grade(s): 11, 12

Prerequisite: The Mission of God

Course Description: Worldviews seeks to help students apply their faith and biblical knowledge, on a practical level, to their lives now and after they leave New Life Academy. This course is designed to provide students with an understanding of how their faith affects their lives and acts itself out on a daily level. An emphasis is placed on comparing the truth of the gospel with competing worldviews and religions. Students learn how to articulate and defend their faith in this world.

Senior Bible Capstone

Length of Class: 1 semester, .5 credit

Required Grade 12

Course Description: The purpose of Senior Capstone is to firmly establish students in the gospel and give them the opportunity to demonstrate their knowledge and application of God's word. Senior Capstone is the culmination of the students' Biblical and Theological training at New Life Academy. The course is a way to pull all of the students' learning and training together and for them to demonstrate not only a mastery of the subject area, but also how the Bible and the gospel integrate and affect their lives.

Worship Arts

Length of Class: 1 year, 1 credit

9th and 10th graders will receive a Fine Art credit for Worship Arts. 11th and 12th graders can receive Fine Art or Bible credit (1 credit max) for Worship Arts.

Open to Grade(s): 9, 10, 11, 12 Prerequisite: Class acceptance by audition and/or interview

See course description in Fine Arts section.

New Life Academy Upper School Course Catalog 2019-20

Business

Entrepreneurship and Business Consulting

Length of Class: 2 semesters, 1 credit

Open to Grades: 11, 12. Pre-requisite: none

This elective course will place students in real world business environments where they will not only study innovation, entrepreneurship and business, but also hone their soft skills and workplace professionalism. This course will also incorporate a "Faith at Work" curriculum as students learn from senior professionals about how they have built successful careers and handled specific challenges in the workplace as Christian leaders. Semester 1 focuses on learning about human centered design, innovation and entrepreneurship and culminates in a competition similar to the famous TV show "Shark Tank." Working in teams, students will learn from professionals about the innovation process, human centered design and new venture business development while creating their own business concept. This will culminate in each team presenting their business proposals to a panel of business entrepreneurship judges. Semester 2 focuses on teams of students working on real consulting projects for local companies where they will face a specific challenge from the organization. Using a specific framework developed by Chris Pears and Ann Senn, retired Senior Partner of Deloitte Consulting, students will research, ideate, evaluate, recommend and formally present solutions on deliverables required by the client.

Economics

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP)

Course Description: This course introduces students to the basic principles of micro and macroeconomics including the following: what is economics, economic systems, American free enterprise, demand, supply, prices, market structures, business organizations, labor, money and banking, financial markets, GDP and growth, economic challenges, taxes and government spending, fiscal policy, the Federal Reserve and monetary policy, international trade, development and globalization. Also there will be case studies of different career fields.

Intro to Accounting

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12 Prerequisite: Algebra II

Course Description: In Introduction to Accounting, students will learn the basic account principles, concepts, and terminology used in the accounting field. Some of the topics to be discussed and created using accounting software will be assets, liabilities, income statements, balance sheets, cash flows, revenues, and other accounting terminology. Accounting is used in multiple career fields to read bank and financial statements, preparing a budget for projects, project budget planning, entrepreneurship endeavors, and managing accounts. This course will give an overview of the role accounting plays in managing money in the business world.

Personal Finance

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: Algebra II

Course Descriptions: This course will include coverage of mathematics applied to real life personal finance. Included will be solid, practical, up-to-date coverage of key personal finance issues that impact our lives daily. The list of topics include banking services, payroll deductions, taxes, insurances, stocks, bonds, mortgages, credit, charitable giving and retirement planning. We will also study money from a biblical perspective, emphasizing God's teaching on proper stewardship of the financial resources He entrusts to us in our lives.

New Life Academy Upper School Course Catalog 2019-20

English Courses

The New Life Academy of Woodbury English Department believes that a primary goal of education is to equip young adults to interact with the world from a Christ-centered perspective. In order to achieve these goals effectively, we want our students to be able to write well, think critically about complex issues, and speak confidently in small and large group settings.

In order to achieve these goals, the English department will focus on developing a love for reading, critical thinking and research skills, as well as crucial listening and speaking tools. By reading various forms of texts, students will not only be able to enjoy the characters they meet, but they will be able to see how themes apply to our world today. They will be able to successfully articulate the complexity of the issues raised in their texts in verbal and written form. From a Biblical perspective, they will be able to engage their peers and teachers in valuable and difficult discussions.

The goal of the English Department is to have all students display the following attributes of an effective Christian citizen:

- Support and defend viewpoints
- Enjoy reading of all types
- Produce clear and effective writing in various forms
- Develop polished public speaking skills
- Understand and respect differing viewpoints

English 9

Length of Class: 2 semesters, 1 credit

Prerequisite: None, Open to Grade(s): 9

Course Description: Students will develop critical and analytical thinking skills as they study composition, grammar, as well as various authors and genres of literature. When finished with this course, students will have explored and developed their organization and fluency of writing, basic research skills, public speaking skills, grammar knowledge, and recognition and understanding of multiple genres of literature.

Honors English 9*

Length of Class: 2 semesters, 1 credit

Prerequisite: English 8 with a grade of A and Counselor Approval, Open to Grade(s): 9

Course Description: Honors English 9 follows a similar curriculum to English 9; however, Honors English will have higher expectations in terms of workload and depth of content. Students will have larger reading assignments, longer writing assignments, and will give formal presentations. The main essays students will write focus on personal reflection, analysis, research, and the implementation of formal structures.

English 10

Length of Class: 2 semesters, 1 credit

Prerequisite: English 9, Open to Grade(s): 10

Course Description: This course is designed to prepare sophomore students to read literature on a deeper level and to study and communicate through writing and speaking. Students will read a variety of novels and plays, as well as many poems and short stories. Students will strengthen their fluency in reading, as well as develop their knowledge of various literary genres (short stories, poetry, plays, novels, etc.). Furthermore, students will strengthen their critical thinking skills through literary analysis and in the writing of investigative papers.

New Life Academy Upper School Course Catalog 2019-20

Honors English 10*

Length of Class: 2 semesters, 1 credit

Prerequisite: English 9 with a grade of A or Honors English 9 with a grade of B+ or higher and/or a minimum cumulative GPA of 3.0, Open to Grade(s): 10

Course Description: The Honors English 10 course follows a similar curriculum as the English 10 course; however, Honors English students will be working at a higher level of expectation. Most units are faster paced, and a greater understanding of grammar and composition is expected. Research papers, analysis essays, novels, short stories, and other works of literature will be studied to prepare students for future literature and composition courses. Students will read a variety of novels and plays with emphasis placed on interpretation, character study, vocabulary, and plot structure.

AP English Literature*

Length of Class: 2 semesters, 1 credit

Prerequisite: English 10 or Honors English 10 with a grade of B+ or higher and/or a minimum cumulative GPA of 3.0, Open to Grade(s): 11, 12

Course Description: This course is a college-level introductory course in reading and critical analysis of literature. The class is designed to expose students to many different types of literature. Writing will be heavily emphasized. Students will read assigned poetry and literature and approved novels of their own choosing. AP practice tests/compositions will help prepare students for the AP Literature exam in the spring to earn possible college credit.

British Literature

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: British Literature is a survey course that examines the classics of British literature from the Anglo-Saxon period to the present. Students will read many genres of literature from all eras of English history (including old, middle, and modern English). Evaluation will be a mixture of tests, quizzes, compositions, class discussions, and participation.

College Writing

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: College Writing is designed to help students improve the writing skills essential in their continued success throughout high school and college. Students will review and learn to apply many skills in this course: correctly using grammar and punctuation conventions in written works, conducting analytical research, and strengthening editing skills. Students will work on a college application essays, personal reflections, expository writing, argumentation and research skills. This class will follow a workshop-type model, meaning students will have constant support from both peers and their teacher in writing conventions, organization, and presentation of written ideas.

Creative Writing

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: Within this writing intensive structure, students will explore various forms of poetry, fiction, and narrative writing including, but not limited to, the following: short story writing, poetry, play writing, and vignettes. Students will focus on writing elements, style, language, point of view, and characterization techniques in their writing assignments. This is a course for students who not only want to improve their writing skills, but also enjoy writing and thinking creatively.

New Life Academy Upper School Course Catalog 2019-20

Journalism

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: Journalism is designed to teach students how to write concisely, to gather important information, to effectively ask questions, and to research important events effectively. Students will learn the inverted pyramid style of writing, AP formatting, and other styles of article flow. Students will understand and master most journalistic styles of articles, including features, profiles, editorials, and opinion articles. In addition to these writing skills, students will identify ethical issues journalists face and consistently observe and discuss current events.

Oral Communication

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, 1 year of ELL for International Students required, Open to Grade(s): 11, 12

Course Description: Oral Communication is designed to teach entry-level speech communication skills and the ethical and moral responsibility of public speaking and leadership. Students will be reviewing many areas of speech communication including confidence building, nonverbal communication, and effective language. They will also practice researching, outlining, and delivering informative, persuasive, impromptu, and how to speeches. In addition, students will take part in a group communication and develop practical skills in interviewing.

Shakespearean Literature

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: In this course, students will read several of Shakespeare's sonnets and plays. Students will engage in discussion and interpretation, which will enable them to develop an appreciation for Shakespeare's style and skill, and give them a greater understanding of the language of Shakespeare and the themes common in his writings.

Survey of American Literature

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: In this course, students will investigate the rich history of American literature from the 18th century to the present. Students will learn about historical, political, and social events that framed American literary movements through the study of short stories, essays, poetry, plays and novels.

The American Novel

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: In this course, students will investigate the rich history of the American novel. Students will learn how historical, political, and social events created the framework for the American novel. The main novels this course will focus on are *The Great Gatsby*, *The Scarlet Letter*, *Into the Wild*, *House on Mango Street*, and *Catcher in the Rye*. Some other short texts may be supplemented to help students' understanding of the time period and authors.

New Life Academy Upper School Course Catalog 2019-20

World Literature

Length of Class: 1 semester, .5 credit

Prerequisite: English 10, Open to Grade(s): 11, 12

Course Description: World Literature is a survey course designed to introduce students to a study of literature from other time periods and cultures around the world. As students study these extremely varying works, they will examine common themes that unite the different cultures. Furthermore, students will discuss how literature from ancient or distinct cultures can still relate to our lives in the modern world.

New Life Academy Upper School Course Catalog 2019-20

Health & Physical Education

Health

Length of Class: 1 semesters, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: none

Course Description: This class is designed to be personal and specific for each student so that they will be able to use this information later in life. The following units will be covered in health: self-worth, depression/suicide awareness, stress, fitness, nutrition/problems with food, dating/sex education/abstinence, and substance abuse. The governing outline of the class includes the physical, mental, social, and spiritual aspects of health.

Physical Education

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: None

Course Description: This course will provide students with opportunities towards understanding the importance of physical wellness. Each student will have the opportunity to enhance their wellness and abilities through a variety of activities and conditioning games.

Strength Training and Personal Fitness

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: none

Course Description: Strength Training and Personal Fitness focuses on the fundamentals of weight training and will help students develop the five aspects of fitness: muscular strength, muscular endurance, flexibility, body composition, and cardiovascular endurance. Strength Training will be introduced as a way to improve personal fitness, and an emphasis on basic techniques and proper safety procedures will be implemented. The class will include weight training, cardiovascular conditioning, and other fitness related activities. If students want to get stronger, tone muscles, improve body composition, lower that mile time, or simply break a sweat on a consistent basis – this is the class for them!

Extracurricular Athletics

Course Description: High school students who successfully complete a New Life Academy high school athletic season may receive .25 credit toward the 1.0 Physical Education graduation requirement. A maximum of two seasons (.5 credit) may be applied towards the 1.0 Physical Education graduation requirement. A P(pass) grade will be assigned for the Physical Education credit earned through the extracurricular athletic season at New Life Academy, therefore not calculating into a student's grade point average. Students may only earn Physical Education credit for New Life Academy athletics and the season must be completed during grades 9-12.

New Life Academy Upper School Course Catalog 2019-20

Mathematics

At New Life Academy, we believe that math benefits our students in at least four areas of their development. Those areas include (1) Professional Development, (2) Character Development, (3) Mental Development, and (4) Spiritual Development.

Professional Development:

Having a strong grasp of mathematics opens the doors to a variety of careers that are not available to those who are not proficient in math. In fact, several studies have concluded that almost all of the top paying undergraduate degrees are math intensive.

Character Development:

Math requires perseverance, and a willingness to be humbled in order to be successful. The process of learning math involves a cycle of trying, making mistakes, fixing mistakes, asking or seeking for help, and trying again. According to Romans 5, the process of perseverance develops character. This process is at the heart of our department philosophy.

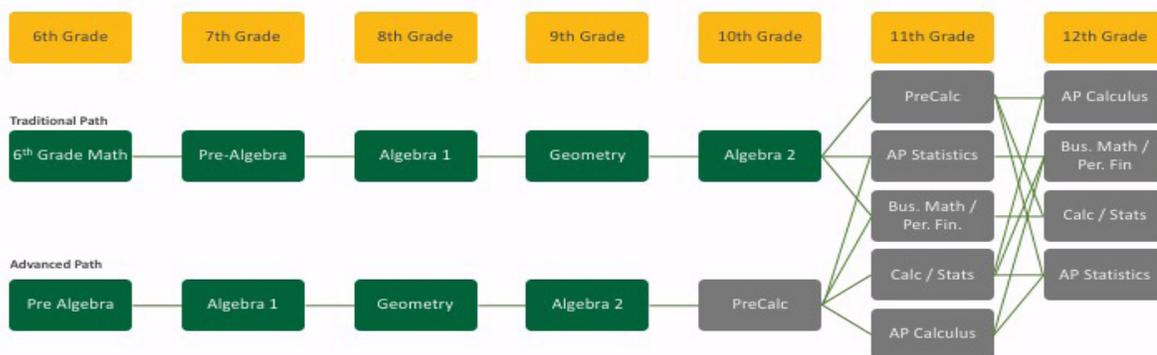

Mental Development:

Even if a student does not pursue a math intensive career, the development of critical-thinking and problem-solving skills are invaluable. Math requires focus, analytical, and linear thinking. Unfortunately, many students only see math as a “collection of recipes” to be followed rather than an opportunity to “learn how to cook”. We strive to help our students develop an appreciation for the development of thought that math fosters.

Spiritual Development:

Galileo said that “Math is the language with which God wrote the universe”. By studying math, we gain an appreciation for the orderliness of creation and his faithfulness to sustain it. By learning math, we discover the order and predictability that God spoke into creation and called good. By studying these patterns, we have the ability to make wise decisions as we navigate this world in stewardship to what God has given us.

While only 3 credits of math are required for graduation, we highly recommend that all New Life Academy students take four full years of math. The following schematic depicts typical math tracks at New Life Academy.

New Life Academy Upper School Course Catalog 2019-20

Geometry

Length of Class: 2 semesters, 1 credit
Open to Grade(s): 9, 10, 11. Prerequisite: Algebra I

Course Description: This course is designed to emphasize the study of the properties and applications of common geometric figures in two and three dimensions. Geometric relationships will be explored using traditional geometric tools to perform constructions and measure figures. Inductive and deductive thinking skills are used in solving real-world applications and proving properties of parallel and perpendicular lines, triangles, and polygons. Algebra skills are applied extensively with area, surface area, and volume formulas as well as the Pythagorean Theorem and basic Trigonometry.

Algebra II

Length of Class: 2 semesters, 1 credit
Open to Grade(s): 9, 10, 11, 12. Prerequisite: Geometry

Course Description: The purpose of Algebra II is to teach students to think, reason, and discover algebra. Linear, quadratic, polynomial, exponential, and logarithmic functions will be solved using a variety of methods, including graphing. Systems of linear equations and inequalities will be explored using elimination, substitution, determinants and matrices. The exploration of complex numbers will expand the students' use of the number system.

Honors Algebra II *

Length of Class: 2 semesters, 1 credit
Open to Grade(s): 9, 10, 11.
Prerequisite: Geometry with a grade of B+ or higher and a minimum cumulative GPA of 3.0

Course Description: This course will include all topics taught in Algebra II, but at an accelerated pace, so that additional topics may be explored. Additional topics include rational functions, introduction to probability and statistics, and further work with matrix operations.

Pre-Calculus*

Length of Class: 2 semesters, 1 credit
Open to Grade(s): 10, 11, 12. Prerequisite: Algebra II

Course Description: Pre-calculus is a course designed to prepare students for AP Calculus while also providing a rich mathematical experience for students who do not plan to take AP Calculus. The course starts with a review of algebra concepts and then moves into the topic of functions. Students will be introduced to the Twelve Basic Functions throughout the book with a major emphasis placed on exponential, logarithmic, and trigonometric functions. Students will learn to work with functions using three methods: algebraic, numerical and graphical. If time allows, students will be introduced to calculus by exploring the basics of limits, derivatives, and integrals.

New Life Academy Upper School Course Catalog

2019-20

Calculus*

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12 Prerequisite: Pre-Calculus

Course Description: Calculus is a semester long course designed for students who want to be introduced to the basic concepts of calculus without the rigor of an AP course. In this course, students will be introduced to Limits, Derivatives, and Integrals and their applications. Like AP Calculus, this class will focus on understanding the concepts and applications of calculus, mostly as they relate to physics. Unlike AP Calculus, this course will focus more on applications that can be modeled using polynomial functions and less on transcendental functions, such as logarithms, exponentials, and trigonometric. The prerequisite for this course is the successful completion of Pre-Calculus.

AP Calculus AB*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12. Prerequisite: Pre-Calculus with a grade of B+ or higher and/or a minimum cumulative GPA of 3.0

Course Description: This is a college-level course designed to lead students in a study of the development of what has oftentimes been considered the most important innovation in mathematical thought. It relies heavily on formulas, practices, and techniques learned in geometry and algebra courses but at the same time delves much deeper into the underlying principles governing those techniques. The majority of the year is devoted to the topics of limits, derivatives, integrals, and approximation, with an emphasis on application. Throughout the course, students will work with functions that are presented four different ways: algebraically, graphically, numerically, and verbally. Students who successfully complete the course and examination may receive credit, advanced placement, or both for a one-semester introductory college statistics course.

Statistics*

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12 Prerequisite: Algebra II

Course Description: Statistics is a semester long course designed for students who want to be introduced to the basic concepts of statistics without the rigor of an AP course. In this course, students will be introduced to the science of understanding data. Like AP Statistics, this includes exploring and understanding data graphically and numerically, exploring relationships between two variables, methods for gathering data, and randomness and probability. Unlike AP Statistics, this course will focus less on Inferential Statistics, such as confidence intervals and significance testing. Inferential Statistics will be introduced and explored mostly through simulation and less through formulas. This class will be more activity based and utilize statistical software more than AP Statistics since development of formulas and statistical theory is not as crucial in an introductory course. The prerequisite for this course is the successful completion of Algebra II.

New Life Academy Upper School Course Catalog

2019-20

AP Statistics*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12

Prerequisite: Algebra II with a grade of B+ or higher and/or a minimum cumulative GPA of 3.0

Course Description: AP Statistics introduces students to the major concepts and tools for collecting, analyzing and drawing conclusions from data. Students are exposed to four broad conceptual themes:

1. Exploring Data: Observing patterns and departures from patterns.
2. Planning a Study: Deciding what and how to measure.
3. Anticipating Patterns: Producing models using probability theory and simulation.
4. Statistical Inference: Confirming models.

Students who successfully complete the course and examination may receive credit, advanced placement, or both for a one-semester introductory college statistics course.

Intro to Accounting

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12 Prerequisite: Algebra II

Course Description: In Introduction to Accounting, students will learn the basic account principles, concepts, and terminology used in the accounting field. Some of the topics to be discussed and created using accounting software will be assets, liabilities, income statements, balance sheets, cash flows, revenues, and other accounting terminology. Accounting is used in multiple career fields to read bank and financial statements, preparing a budget for projects, project budget planning, entrepreneurship endeavors, and managing accounts. This course will give an overview of the role accounting plays in managing money in the business world.

Personal Finance

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: Algebra II

Course Descriptions: This course will include coverage of mathematics applied to real life personal finance. Included will be solid, practical, up-to-date coverage of key personal finance issues that impact our lives daily. The list of topics include banking services, payroll deductions, taxes, insurances, stocks, bonds, mortgages, credit, charitable giving and retirement planning. We will also study money from a biblical perspective, emphasizing God's teaching on proper stewardship of the financial resources He entrusts to us in our lives.

New Life Academy Upper School Course Catalog 2019-20

Science

“Since the beginning of creation, God’s invisible qualities, his eternal power and divine nature, have been clearly seen, being understood by what has been made, so that men are without excuse.” Romans 1:20 (NIV)

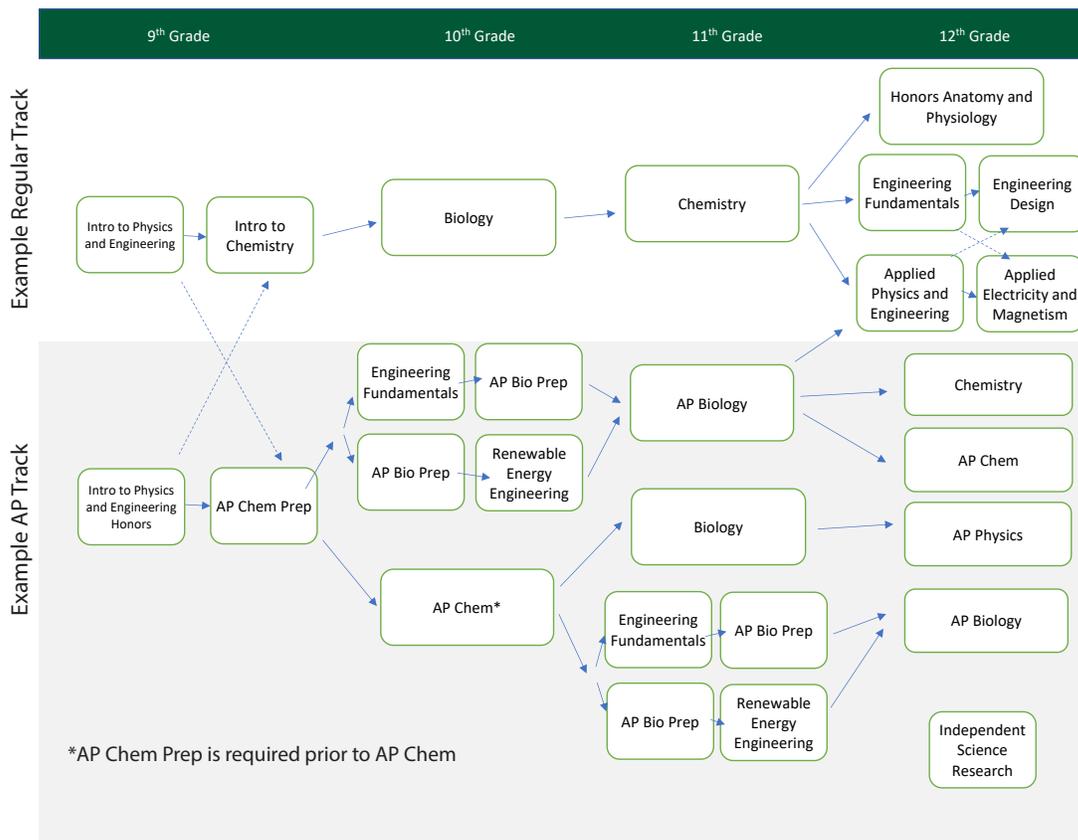

The focus of our science program is to teach a full understanding of science and engineering principles and science practices while at the same time showing how science reflects the nature of God through His creation. To accomplish these goals, we focus on having students

- discover the core nature of this physical world through inquiry and hands-on learning
- gain a foundational understanding of the core principles in each subject so that students can visualize and apply their knowledge to this world.
- learn the practices of doing science through the use of scientific instruments and technology
- incorporate engineering practices into all of our course work
- see that all aspects of this physical world point to a designer and creator of the universe

Highlights:

- **Engineering Competitions:** Each year, there are various engineering competitions in the Physics classes. The Bridge Building (strongest bridge with the least mass made of only toothpicks) and the Egg Drop Carrier (structure made of only straws and string that can carry an egg through a 5 meter drop) are some of the most popular.
- **Lab Inquiry:** Discovering fundamental principles of nature through problem solving – is utilized in all our science classes

Science Tracks: New Life Academy offers two main science tracks (Regular and AP). The following schematic shows an example of how the courses in each track can be organized starting in 9th grade.

New Life Academy Upper School Course Catalog

2019-20

Intro to Physics and Engineering

Length of class: 1 semester, 0.5 credits

Open to grades: 9. Prerequisite: None, must be paired with Intro to Chemistry or AP Chem Prep

Course Description: Intro to Physics and Engineering is an introduction to one of the three major branches of Science-Physics. The emphasis in this course is for students to obtain a solid understanding of the process of science and the major topics of Physics. In addition, students will apply the basics of engineering design. This course gives a broader and more complete understanding of science beyond basic knowledge and memorization. Critical thinking skills are pursued through inquiry and project-based learning. STEAM is also integrated through hands-on learning and interdisciplinary projects. Furthermore, it is an essential course for developing the skills and framework to be successful in subsequent Physics and Engineering courses. Biblical worldview is incorporated through discussion of the beauty and complexity of God's natural world and the laws which govern it. Scientific Inquiry and engineering concepts will be applied to the basic and major topics in Physics which include forces, motion, energy, waves, electricity and magnetism.

Intro to Physics and Engineering Honors *

Length of class: 1 semester, 0.5 credits

Open to grades: 9. Prerequisite: None, must be paired with Intro to Chemistry or AP Chem Prep

Course Description: Intro to Physics and Engineering is an introduction to one of the three major branches of science- Physics. The emphasis in this course is for students to obtain a solid understanding of the process of science and conceptualize the major topics of Physics through mathematics. In this course, students will work at an accelerated pace (compared to the non-honors class) and apply concepts from algebra to Physics. Students will also learn the basics of engineering design. Critical thinking skills are pursued through inquiry and project-based learning as well as through algebraic applications. STEAM is also integrated through hands-on learning and interdisciplinary projects. Furthermore, it is an essential course for developing the skills and framework to be successful in the upper level Physics and Engineering courses. Biblical worldview is incorporated through discussion of the beauty and complexity of God's natural world and the laws which govern it. Scientific Inquiry and engineering concepts will be applied to the basic and major topics in Physics which include motion, forces, Newton's laws, energy, waves, electricity and magnetism.

Intro to Chemistry

Length of class: 1 semester, 0.5 credits

Open to grades: 9

Prerequisite: None, must be paired with Intro to Physics and Engineering or Intro to Physics and Engineering Honors

Course Description: Intro to Chemistry is an introduction to one of the three major branches of science- Chemistry. The emphasis in this course is for students to obtain a solid understanding of the process of science and what science describes. While scientific inquiry has been addressed in previous years of science, this course gives a broader and more complete understanding of scientific thinking beyond basic knowledge and memorization. As a result, it is a laboratory-based class focusing on a "hands-on" understanding of scientific inquiry and basic concepts in Chemistry. STEAM is also integrated through hands-on learning and interdisciplinary projects. Biblical worldview is incorporated through discussion of the beauty and complexity of God's natural world at the microscopic level. Finally, it is an essential course for developing the skills and framework to be successful in the upper level Chemistry and Biology courses. The major topics include matter, atomic structure, periodic table, chemical bonds and chemical reactions.

New Life Academy Upper School Course Catalog

2019-20

AP Chemistry Prep*

Length of class: 1 semester, 0.5 credits

Open to grades: 9

Prerequisite: None, must be paired with Intro to Physics and Engineering or Intro to Physics and Engineering Honors

Course Description: Pre-AP Chemistry is an introduction to one of the three major branches of science-Chemistry. The emphasis in this course is for students to obtain a solid understanding of the process of science and what science describes as well as have a solid foundation in basic chemistry. This course covers chemistry concepts at a more accelerated pace so that a broader range of topics can be covered. However, topics are still covered at an in-depth level so that topics can be mastered and students are well-prepared to succeed in AP Chemistry, if desired. Scientific thinking and inquiry are applied to Chemistry topics. It is also a laboratory-heavy class focusing on inquiry based learning and critical thinking skills. STEAM is also integrated through hands-on learning and interdisciplinary projects. Biblical worldview is incorporated through discussion of the beauty and complexity of God's natural world at the microscopic level. Finally, it is an essential course for developing the skills and framework to be successful in the upper level Chemistry and AP Chemistry courses. The major topics include matter, atomic structure, periodic table, chemical bonds, chemical reactions.

Biology

Length of Class: 2 Semesters, 1.0 credit

Open to Grades: 10-12.

Prerequisites: Intro to Physics and Engineering and Intro to Chemistry (or Physical Science equivalent)

Biology is the study of living things. The objective of this biology course is to provide students with enough background information of the environment and living things, that they will be able to make educated decisions in their lives and to help them gain an understanding of the complexity of God's creation. Students will learn through various modes of instruction including unit-based projects, inquiry-based labs and hands-on activities. The goal of the course is that students will have met the basic state standards in biology required for graduation. Students completing this course will have a strong foundation if they wish to take future biology related classes. Biology I will cover The Nature of Life, Ecology, and Cells units. Biology II will cover Genetics, Evolution, and Diversity of Life.

AP Biology Prep*

Length of Class: 1 Semester, 0.5 credit

Open to Grades: 9-12

Prerequisite: Intro to Physics and Engineering and Intro to Chemistry (or Physical Science equivalent)

Pre-AP Biology is a one semester course that is designed to prepare students for the Advanced Placement Biology course usually taken as a junior or senior in high school. In Pre-AP Biology, students will conduct laboratory investigations using scientific methods and make informed decisions using critical thinking and scientific problem solving. Students in Pre-AP Biology study a variety of topics that include: cell structure, plant and animal systems, genetics, and plan/animal evolution. This course is faster paced than the general biology course and requires a good amount of studying, memorization of many terms and concepts to prepare you for the academic rigor of AP Biology.

New Life Academy Upper School Course Catalog

2019-20

AP Biology*

Length of Class: 2 Semesters, 1.0 credit

Open to Grades 11-12; 10th grade by science dept. recommendation Pre-requisite: Biology or AP Bio Prep

The AP Biology course covers topics typically found in a first-year college biology course and advances the student's understanding of concepts normally covered in high school biology. It provides a solid preparation for the AP Biology exam. Major course themes include biochemistry, energy transfer, cellular structure and specialization, cellular metabolism, mitosis and meiosis, genetics, ecology, and evolution. This course includes a laboratory component designed to meet College Board standards and has been reviewed and approved by the College Board. Students can expect challenging content, a rigorous pace, extensive lab work, a significant time commitment to studying and reading, and MANY REWARDS for putting in all of the effort it takes to be successful in AP Biology.

Honors Anatomy and Physiology*

Length of Class: 2 Semesters, 1.0 credit

Open to Grades: 11-12. Pre-requisite: Biology or AP Bio Prep

Anatomy and Physiology is the study of the structure and function of the human body. This course is designed for students who were successful in their biology class and who would potentially be interested in going into a medical/biological career field or who are interested in fulfilling a general college science requirement. Material will be covered in an in-depth and fast paced manner. Students are expected to put in a substantial amount of time outside of the class period (6 hours per week minimum). The class will focus on the major organ systems (integumentary, skeletal, muscular, nervous, cardiovascular, immune, respiratory, and digestive). Diseases and disorders related to each body system will be studied. Students will often do laboratory activities. Dissections will be completed of various organs, such a heart and brain. At the end of the course, a cat will be dissected to observe how all of the body systems interact. Class time will typically be spent on process oriented guided inquiry based learning (POGIL) activities, laboratory work, cooperative quizzes and unit exams. The learning environment will emphasize interactive group work.

Chemistry

Length of class: 2 semesters, 1 credit

Open to grade: 10-12. Prerequisite: Algebra 1 and Intro to Chemistry (or Physical Science equivalent)

Course Description: The Chemistry course emphasizes developing a strong visual model of how atoms and molecules behave and interact with each other. Each unit is structured around a problem in everyday life that can be solved by using Chemistry. Laboratory activities and problem solving will be utilized to solve these problems by using correct measuring and analyzing of chemical processes. Throughout the course, emphasis is also given to recognizing how matter is detailed, ordered, and complex. This aspect gives strong evidence that the universe we live in did not come by chance, but was designed by a Creator. The first semester emphasizes the structure of the atom and the structure of matter while the second semester emphasizes chemical reactions and chemical energy.

New Life Academy Upper School Course Catalog

2019-20

AP Chemistry*

Length of class: 2 semesters, 1 credit

Open to grade(s): 10-12

Prerequisite: AP Chem Prep (or Chemistry), Algebra II with a grade of B+ or higher and minimum cumulative GPA of 3.0 (incoming 11th and 12th graders may take AP Chemistry without the prerequisite of Pre-AP or Chemistry)

Course Description: The AP Chemistry course follows the material similar to an introduction chemistry course at a university. It is a survey course that covers all aspects of Chemistry. Much of the understanding involves extensive mathematical calculations where the knowledge from a first high school chemistry course is applied to a deeper level, therefore, it is recommended to take this course as a second-year Chemistry course. Students may take it as their first full Chemistry course but must understand the rigor needed to be successful. Many precise laboratory experiments using digital and calibrated equipment will be performed throughout the year to gain a deeper understanding of chemistry and fulfill some of the course requirements for college credit. The first semester focuses on developing basic chemistry concepts to a deeper level, while the second semester focuses on the 5 big ideas of AP Chemistry: chemical equilibrium, thermochemistry, chemistry kinetics, acids and bases, and electrochemistry.

Applied Physics and Engineering

Length of Class: 1 semester, 0.5 credit (credit can be applied to both Engineering and Physical Science credit)

Open to Grades: 10-12. Prerequisite: Intro to Physics and Engineering (or Physical Science equivalent),

Currently enrolled or have passed Algebra II

Course Description: Applied Physics and Engineering emphasizes developing a strong conceptual understanding of physical principles and applying it to everyday experience in order to solve problems.

Concepts such as motion, force, and energy will be applied to everyday life such as sports, construction design, and the making of specified devices. Laboratory activities will strongly utilize digital devices and typically have an engineering aspect to them. There will be several major engineering projects and competitions aimed to develop engineering technique and critical thinking. Algebraic mathematics will be used to solve these problems.

AP Physics*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12. Prerequisite: Pre-Calculus with a B+ or higher and/or a cumulative GPA of 3.0 /

Completion of AP Calculus or currently enrolled in AP Calculus

Course Description: The Advanced Placement Physics C course follows the material similar to one semester of a calculus-based Physics course at a university. It focuses on the mechanics portion of Physics only. [The Physics C course by The College Board also offers a test in Electricity. However, we will not be covering that material nor will students take that portion of the AP test.] Much of the understanding involves extensive mathematical calculations and problem solving. Calculus will be used and taught throughout the course. A student enrolled in Calculus in the same year will be taught the basic calculus principles in the Physics class. Many precise laboratory experiments using digital and calibrated equipment will be performed throughout the year to gain a deeper understanding of Physics and fulfill some of the course requirements for college credit. In addition, there will be several major building competitions similar to those done in Applied Physics.

New Life Academy Upper School Course Catalog 2019-20

Applied Electricity and Magnetism (Applied E&M)

Length of Class: 1 semester, 0.5 credit (credit can be applied to both Engineering and Physical Science credit)

Open to Grades: 10-12. Prerequisite: Intro to Physics and Engineering (or Physical Science equivalent), Currently enrolled or have passed Algebra II

Course Description: Applied Electricity and Magnetism is an ideal continuation of Applied Physics and Engineering but can be taken as a stand-alone class. The emphasis will be placed on developing a strong conceptual understanding of physical principles and applying it to everyday life in order to solve problems. Concepts such as machines, electricity, magnetism, and electronics will be applied to everyday life such as building of machines, designing of electrical circuits, home electricity, and electronic devices. There will be several major engineering projects aimed to develop engineering technique and critical thinking. Algebraic mathematics will be used to solve these problems.

Engineering Fundamentals

Length of Class: 1 semester, 0.5 credit

Open to Grades: 9-12. Pre-requisite: Algebra I

Course Description: The Engineering Fundamentals course is a framework for understanding the role of engineering in everyday life and an exploration of various engineering disciplines and careers. Students in this class will engage in practical problem-solving challenges that weave science, technology, aesthetics and math into the principles of engineering design. Students will study the historical development of everyday objects and examples of where failure has led to improvements in designed solutions. Much like professional engineers, students will work in teams and record their thoughts, ideas, sketches, calculations and reflections in their engineering journals. Every unit of engineering discipline concludes with a STEM project. The coursework for this class includes Schoology discussions, reading assignments, team STEM challenge activities, engineering journals and a final individual project.

Engineering Design

Length of Class: 1 semester, 0.5 credit

Open to Grades: 9-12. Pre-requisite: Algebra I

Course Description: Engineering Design course features hands-on, design-based activities that feature STEAM and career connections. Students will be inspired to identify needs or problems affecting the world around them and use the engineering design process to propose viable solutions. By working in teams, students will explore the fields of electrical, environmental, biomedical and other engineering fields through a series of challenges that illustrate how engineering can improve people's lives and lead to more efficient and sustainable environmental solutions. The coursework for this class includes Schoology discussions, reading assignments, labs, quizzes, team challenge activities, engineering journal reports and a final project. ****To find out how to take this course for college credit, talk to Mrs. Motalebi.****

Independent Science Research

Length of Class: 1 semester, 0.5 credit

Open to Grades: 11-12. Pre-requisite: Approved by the Academic, College and Career Department

Course Description: This course is designed to be an independent study where students will work on experimental research, STEAM Innovation, or college level science assignment of their choice. The students will research, design, and experiment on a research question in a field of science or engineering of their choice. The end result will be a fully analyzed project that will be submitted to a national/global competition or submit original research to a science publication. The students will work independently on literature research regarding their topic, experimental research in the lab, and understanding science concepts while having a science teacher as an advisor. This is only intended for students who are interested in pursuing science or engineering for their career and who have a strong aptitude towards scientific research that is open-ended

New Life Academy Upper School Course Catalog 2019-20

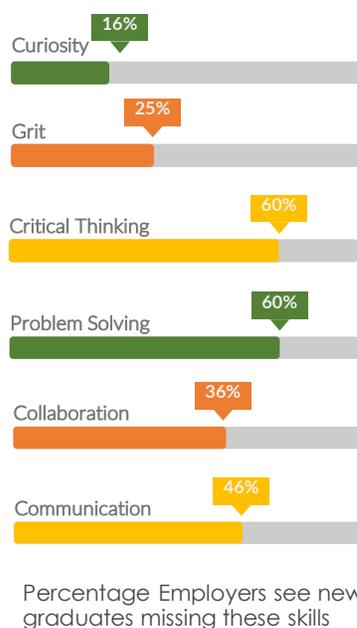

15% IP Program: Shaping Future Leaders

At New Life Academy, students in grades 6-12 build a solid foundation in STEM/STEAM integration through long-term, student-driven 15% Innovation Portfolio projects. Students are inspired and encouraged by NLA faculty to connect their academic learning to the real-world applications and think critically in identifying personal or global needs and designing testable solutions. Students are given 15% work time in science classes to research their topics and evaluate data. They also have the option of joining one or more STEAM clubs and collaborate as a team or work independently on a desired project. The Robotics & Coding, Ecology, Engineering and Independent Research Clubs are coached by one or more NLA teachers who have the passion and expertise in these subjects. Students initiate and lead projects through scientific inquiry, engineering design or coding and have the opportunity to participate in the Twin Cities Regional Science Fair, First Tech Robotics or other challenges within and outside of NLA. All students are required to graduate with a portfolio that demonstrates efforts and growth in innovative thinking throughout their education at New Life Academy. 15% IP projects are evaluated in Science classes based on independent initiative, implementation, quality and effort, collaboration and teamwork at the end of each semester. Many projects are related to humanitarian causes or environmental sustainability and are reflective of the Christian worldview education threaded into all aspects of students' life. Many of the 15% IP projects are featured at the annual NLA STEAM Fair, where students have the opportunity to interact with professional judges and receive awards. This program ultimately equips students with skills needed to use God-given gifts and resources and prepare for their future endeavors and careers.

What skills does the 15% IP Program Develop and why does that matter?

Our goal at New Life Academy is to equip students not only for college but for life. A 2016 survey¹ of 63,924 managers indicates that they do not feel that their recent college graduate hires are ready for the work force and have indicated that they are missing these skills:

An additional study² shows that at least a 1/3 of college students do not improve their critical thinking and

problem solving skills during college. A recent article in the Wall Street Journal said "Colleges need to focus on preparing students for the workforce by incorporating more soft skills into their curriculum. Maybe with a little more experience in critical thinking and problem solving, graduates will be ready to take on the world."

As a K-12 Christian school striving for excellence in all areas, we say why wait for college? How can we prepare our students with these skills now.

STEAM education and 15% IP is an integrated approach to learning that encourage students to discover, explore, create, innovate, problem-solve and think critically. Solving real-world problems starts with inspiring kids to ask questions.

This is the basis for the 15% IP program so our students begin developing these skills now. While 15% IP program is part of the science curriculum, many projects are related to humanitarian causes or environmental sustainability and are reflective of the Christian worldview education threaded into all aspects of students' life. All students regardless of career or subject interest benefit from the valuable skills that are developed while creating their Innovation Portfolio.

1. 2016 *Workforce-Skills Preparedness Report*. (Rep.). (2016). Payscale.

2. Belkin, D. (2017, June 5). Exclusive Test Data: Many colleges fail to improve critical-thinking skills. *Wall Street Journal*.

New Life Academy Upper School Course Catalog 2019-20

Social Studies

We can be almost certain of being wrong about the future, if we are wrong about the past". – G. K. Chesterton. The Social Sciences reveal God's providence, man's nature, and humanities role in God's plan of justice and mercy.

World History & Geography

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 9. Prerequisite: none

Course Description: World History and Geography is designed to help students achieve several goals: 1) familiarize themselves with the basic facts of geography, history, and culture that every educated person needs to know to be an informed citizen of the world; 2) provide a foundation for later courses in many fields which assume such general knowledge; 3) illustrate the rich variety of ways that human beings have found of living in civilizations from God's creation to modern times; and 4) stimulate student's curiosity to learn more.

United States History

Length of Class: 2 semester, 1 credit

Open to Grade(s): 10. Prerequisite: World History and Geography

Course Description: United States history is designed to provide students with an overview of American history from the prerevolutionary era through the modern day. Specific emphasis is placed on the integration of Christian worldview into the study of American History. When Christian faith and worldview are integrated into the teaching of history, history comes alive with meaning and purpose. History becomes a journey with an end. Every act and event then has moral significance and thus is important to understand. Students are taught their actions matter and ethics are not just situational. Students will learn to work individually and in collaborative groups, to write and think critically and articulately, to interact with media, the written word, and historical interpretation, and to conduct themselves with humility, grace, and intelligence.

AP United States History*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 10. Prerequisite: World History and Geography with a grade of B+ or higher and a minimum cumulative GPA of 3.0

Course Description: AP United States history is designed to develop the analytical skills and factual knowledge necessary to deal critically with the problems and materials in American history. This class has two main goals. One is to prepare for passing the AP exam in united states history. The more important of the two goals of this class is to develop more perceptive and informed students. AP United States History will cover the pre-revolutionary era through the modern day in American history. Students will have to know not simply what happened, but why, how, and why it was significant. Students will learn to assess historical materials – their relevance to a given interpretive problem, their reliability, and their importance – to weigh the evidence presented in historical scholarship and primary source materials. Students will learn to work collaboratively and individually, and to think and write critically, analytically, and articulately. Enthusiasm for history and hard work will have as much to do with success in AP United States history and on the AP exam as ability.

AP Art History*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12. Prerequisite: Any AP class, Art or History class Studio Art, Applied Design, 2-D/ Printmaking/ Photography, Sculpture, or Painting/Drawing with a grade of B+ or higher and/or a minimum cumulative GPA of 3.0

*AP Art History can fulfill a 1 credit for Fine Arts or 1 credit for History

New Life Academy Upper School Course Catalog 2019-20

Course Description: AP Art History is designed to provide the same benefits to high school students as those provided by an introductory college course in art appreciation or art history or the humanities. This course will educate and enhance understanding and enjoyment of architecture, sculpture, painting, and other art forms within historical and cultural contexts. In this course, students examine major forms of artistic expression from the past and present and from a variety of cultures. Students will learn to look at works of art critically, with intelligence and sensitivity, and to articulate what they see or experience. AP Art History will help students develop visual literacy, oral and written skills of comparative analysis (emphasizing descriptive and analytical writing about works of art and architecture from many cultures and time periods), and the understanding of those works in historical and sociological contexts (politics, religion, patronage, gender, function, ethnicity, and formal stylistic observations). An optional AP exam may be taken for an additional fee. Students scoring a 3 or above on the exam (1-5 possible) receive college credit, advanced placement, or possibly both, at certain colleges/ universities. AP Art History can be applied (if passed and approved by college) to either an Art History or general art appreciation or humanities courses in college.

AP European History*

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP) with a grade of B+ or higher and a minimum cumulative GPA of 3.0

Course Description: AP European History is designed to develop the analytical skills and factual knowledge necessary to deal critically with the problems and materials in European history. This class has two main goals. One is to prepare for passing the AP exam in European History. The more important of the two goals of this class is to develop more perceptive and informed students. AP European History will cover renaissance Europe through the modern day with emphasis on the years 1450 - 1970. Students will have to know not simply what happened, but why, how, and why it was significant. Students will learn to assess historical materials – their relevance to a given interpretive problem, their reliability, and their importance – to weigh the evidence presented in historical scholarship and primary source materials. Students will learn to work collaboratively and individually, and to think and write critically, analytically, and articulately. Enthusiasm for history and hard work will have as much to do with success in AP European History and on the AP exam as ability.

Civics

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP)

Course Description: The purpose of this class is to provide a broad knowledge and understanding of the history, philosophy and workings of the political system on a local, national and global level. The class will study civic skills, civic values and principles of democracy, rights and responsibilities, governmental institutions and political processes, and relationships of the U.S. to other nations and organizations. Students will be challenged to think critically about their own relationship and role in politics and how this understanding fits within a broader Christian worldview.

Comparative World Governments

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP)

Course Description: Comparative Government is designed to provide students with an overview of the major governmental systems including democracy in the United States. Students will study the concept of country, government, and the political culture in such countries as Britain, France, Germany, Russia, China, and India and compare those governments and political cultures to democracy in the United States. Students will learn to work individually and collaboratively in groups thinking critically and writing analytically about living as a Christian and as a global citizen in this world.

New Life Academy Upper School Course Catalog 2019-20

Cultural Anthropology

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: World History and US History

Course Description: This course is a holistic, comparative approach to the study of human culture, with specific application to Christian evangelization and mission. Topics include cultural diversity and adaptive strategies, language, marriage, and kinship, religious beliefs and rituals, politics, economics, art, types of groups, social change, and issues of culture contact and cultural survival. The course is designed to prepare us for work and Christian service within other cultures. Thus a critical view of cultural anthropology as it relates to theology will lead us to our main concern, and that is missiology – the study and practice of God’s mission in the world. We will make a conscious effort to maintain a “discussion” between anthropology, theology, and missiology. Through this learning process, we will be challenged, inspired, and empowered to reflect missiologically on our cross-cultural participation in God’s mission in the world.

Economics

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP)

Course Description: This course introduces students to the basic principles of micro and macroeconomics including the following: what is economics, economic systems, American free enterprise, demand, supply, prices, market structures, business organizations, labor, money and banking, financial markets, GDP and growth, economic challenges, taxes and government spending, fiscal policy, the Federal Reserve and monetary policy, international trade, development and globalization. Also there will be case studies of different career fields.

PSEO Psychology*

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP)

** This is an On-site PSEO college class taught at New Life Academy, for which students will receive 4 college credits. It is a challenging, rigorous course, and students should be able to read at a college level. Students MUST fill out PSEO forms online at the University of Northwestern, St. Paul in order to take this class.

Course Description: PSEO Psychology is designed to provide students with an overview of the study of psychology from a Christian worldview. Students will study areas of psychology such as child development, the brain, perception, classical conditioning, operant conditioning, information processing, social psychology, and intelligence. Students will learn to work individually and collaboratively in groups responding to one another in both verbal and written form as well as think critically and reflectively.

Sociology

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12. Prerequisite: US History (regular or AP)

Course Description: Sociology is designed to provide students with an overview of the major sociological theorists and theories, as well as integrating those theories into a study of human relationships. Specific emphasis is placed on the integration of Christian worldview into the study of sociology. Students compare, in discussion and in analytical essay writing, the secular worldview of sociology with the Christian worldview in areas such as family, marriage, poverty, and work. Students will learn to think critically and write analytically articulating a Christian worldview on important social and cultural issues in today’s world.

New Life Academy Upper School Course Catalog 2019-20

Technology

Intermediate Technology

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: none

Course Description: Students will develop digital communication skills through a variety of software and online tools. Students will learn 21st century skills by experiencing real-world applications for collaborating with classmates and problem solving. The tools learned in this class will empower students to better express themselves and showcase their knowledge. By working with technology as part of project based curriculum, students more easily develop the essential, lifelong digital communication skills they will need in virtually all their academic and professional pursuit. Intermediate to advanced capabilities in the areas of photo/video editing, web design and desktop publishing will be covered.

Computer Science

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: Intermediate Technology Recommended

Course Description: This course is an introduction to computer science and software engineering to understand the study of computers, developing software applications and computational processes. Students will learn a variety of programming systems and languages to create interactive systems and applications. Students will learn problem solving, software design, debugging strategies, and the foundations of computer science (data structures, procedures, and algorithms). Students will work on projects in the areas of software systems, graphics, computational science and software engineering.

Digital Photography I

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: none

*The Digital Photography course can fulfill a .5 credit for Fine Arts or .5 credit for Technology

Course Description: Digital Photography will look into the world and artists of digital photography. The class will be split up into 5 sections: History of digital photography, learning how to use your camera, learning how to use Photoshop/Lightroom, 8-10 photography projects based off of 8-10 styles of photography and a final project. Students will be graded based on effort, execution and planning, as well as weekly exercises, attendance and participation. We will also take a field trip at the end of the semester to exercise all the techniques that have been learned. Required: Students must provide their own DSLR camera.

Digital Photography II

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: Digital Photography I

*The Digital Photography II course can fulfill a .5 credit for Fine Arts or .5 credit for Technology

Course Description: Digital Photography II is a continuation of what is learned in Digital Photography I.

New Life Academy Upper School Course Catalog 2019-20

Intro to Filmmaking

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: none

*The Intro to Filmmaking course can fulfill a .5 credit for Fine Arts or .5 credit for Technology

Course requirements

A camera with video capabilities. Any will do. It is preferable that it is one with a manual focus. A phone will work.

- A portable external hard drive (at least 350 GB)
- An SD card with at least 16 GB
- Headphones

Course Description: In this course, students are introduced to the basics of filmmaking. With a focus on technical and narrative structure, students produce short narrative and documentary projects through individual and group work. Topics include basic cinematography, camera shots and movements, basic light techniques, editing techniques, and introductory sound design. Students will acquire hands-on experience in digital film production.

Graphic Design I

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: An art or technology class is recommended.

*Can fulfill a .5 credit of Fine Arts or .5 credit for Technology

Course Description: The ability to visually solve problems is what defines graphic design, and its effectiveness is measured by a designer's ability to convey the message they seek to send through a variety of channels including logos, posters, advertisements, website, package design, branding material, etc...In this class we will examine these platforms and others, as well as look at the history, theory, and the tools that can be used to achieve effective graphic design. This course will introduce students in the basic language and principles of Graphic Design. Students will learn the basics of good design by using Adobe Illustrator and Photoshop software applications, as well as illustration to create various designs. Great class for those pursuing Marketing, Design or Visual Arts.

Graphic Design II

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: Graphic Design I with a 3.0 or higher

Course Description: In this class you will continue to examine the history, theory, and the tools that can be used to achieve effective graphic design. Students will use the language and principles of Graphic Design to implement learning into successfully designed projects and art. Students will expand their knowledge of Adobe Illustrator, Photoshop, and InDesign software applications, as well as illustration to create various media. Students will also help guide, instruct, and critique Graphic Design I students in order to build a creative environment which fosters innovation and encouragement to have all students develop the process of communicating information through creative applications.

Publications

Length of Class: 1 semester, .5 credit

Open to Grade(s): 9, 10, 11, 12. Prerequisite: none

Course Description: Publications is an elective offered to high school students who desire to be part of the team that develops NLA's yearbook and newspaper. Students will exercise creativity while developing skills in project planning, desktop publishing, photography, journalism, marketing, and sales. Publications is a fun, yet challenging class, as students are required to follow specific guidelines for project consistency, independently manage their time and resources, and complete top quality assignments by all deadlines set. The publications team is ultimately responsible for collecting memories throughout the year and will work together to record them in an unforgettable way.

New Life Academy Upper School Course Catalog 2019-20

World Language

God reveals himself through language and culture. The study of languages and cultures enables us to gain knowledge, explore ideas, and communicate effectively. It is by nature an integrated study of literature, reading, writing, listening and speaking. Through languages we strengthen our relationship with God and are able to communicate his message to others close to home and around the world.

Upper School students must take 2 credits of a World Language. If they took Spanish I in 8th grade, they will still need 2 full credits in Upper School.

Spanish I

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 9, 10, 11. Prerequisite: none

Course Description: Spanish I is intended to instruct students in the development of their interpersonal, interpretive, and presentational skills in Spanish. This will be done by performing an assortment of language functions: to list, to ask questions, to describe, to narrate, to write on a variety of topics, and to converse on familiar topics. These will be learned in different contexts, such as at home, in school and through videos, music, role-playing or games. Topics covered include the classroom and school environment, daily life, food, sports, family, making plans, and culture.

Spanish II

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 10, 11, 12 Prerequisite: Spanish I

Course Description: Spanish II continues education in the Spanish language. Students will be performing an assortment of language functions: to give and follow directions, to narrate, to express opinions and defend them both orally and in written work, to hypothesize, to read short stories and articles, to write on a variety of topics such as clothing, family, parts of the body and travel, and to converse on familiar topics. These will be learned in similar contexts as in Level I such as at home, in school, and in the community. Topics that will be covered include daily routine, conversational tools to get to know others, staying fit and healthy, discussing the past, and life in the community.

Spanish III

Length of Class: 2 semesters, 1 credit

Open to Grade(s): 11, 12 Prerequisite: Spanish II

Course Description: Spanish III is intended to advance the students' development of their interpersonal, interpretive, and presentational skills in Spanish. This will be done using these main objectives: to review basic grammar and provide an overview of all common verb tenses, to develop vocabulary and grammar structures (including new tenses that do not exist in English), and to expand knowledge of and appreciation for Hispanic people and cultures. They will discuss topics such as family, jobs and professions, nature and environment, and free-time activities. The students will also go to a play or an enrichment activity in the fall or spring, in a St. Paul or Minneapolis Spanish neighborhood, with the CIS Spanish class.

New Life Academy Upper School Course Catalog 2019-20

CIS Spanish*

Length of Class: fall semester SPA201, spring semester SPA202, 2 semesters, 1 credit

Open to Grade(s): 11, 12. Prerequisite: Spanish III with a grade of B+ or higher and/ or a minimum cumulative GPA of 3.0

Course Description: This fourth year of Spanish is intended to advance the students' development of their interpersonal, interpretive, and presentational skills in Spanish and increase their appreciation for Hispanic people and cultures. Students will develop their communication skills in Spanish as we explore a variety of traditional and contemporary topics from different worldviews. This will also be done while reviewing grammar studied thus far in their language education and learning more complex forms of grammar. We will use as a springboard for discussion perspectives within our own cultures and how these differ from or coincide with those within Hispanic cultures. They will also read a comprehensive input book titled "La guerra sucia" about the difficult times in Argentina. In 2nd semester CIS Spanish, students will focus on the controversial topic of immigration from Latino/a perspectives examining the result of various economic, political and socio-cultural factors that push immigrants out of their homeland and to the United States. They will be reading a novel titled "Cajas de cartón" in Spanish as well as work on two workbooks on the two past tenses and the subjunctive mood.

Please Note: There is an additional college credit fee of approximately \$390 (\$195 per semester) required for this course as well as workbook fees. In addition to high school credit, students will receive Bethel University college level credits.

Additional Opportunities

PSEO Class

Length of Class: 1 semester, .5 high school credit will be given for a 1-2 college level class, 1 high school credit will be given for a 3-4 college level class

Open to Grade(s): 11, 12

Course Description: Students will be given a PSEO Class period for time to work on their Online PSEO course they previously registered for. If students are interested in signing up for the PSEO Class and have time in their day to work on courses they must meet the college requirement, submit application to college and submit the MN State Form to the NLA registrar. After the registrar receives and fills out the MN State Form, the student is responsible for sending all paperwork to the college and must meet all deadlines.

Study Hall

Length of Class: 1 semester, no credit

Open to Grade(s): 9, 10, 11, 12 Prerequisite: none

Course Description: Study Hall is a class period in which students apply themselves to learning and understanding through completion of assignments, studying, and reading. It can also provide students with an opportunity to access the school library, counseling office, and to obtain individual help with assignments from staff. Study Hall decorum includes reporting to Study Hall on time with materials to stay occupied throughout the entire period. Materials considered inappropriate for school are not allowed in Study Hall. Students are required to maintain a quiet study environment and follow established protocol for leaving Study Hall for other destinations.

Teacher/Staff Aide

Length of Class: 1 semester, .5 credit

Open to Grade(s): 11, 12 Prerequisite: none

Grading: Pass/Fail

Course Description: Aide positions are subject to availability. Interested students will be placed based upon faculty/staff needs. The aide positions provide students with vocational experience in an educational setting. Aides have the opportunity to practice professional skills in a realistic occupational position. Students are expected to report to aide assignments just as any other class and to give their supervisor advance notice of upcoming absences (doctor/dentist appointments, sports events, etc.) Earning credit depends on attendance and performance.

ELL (English Language Learners)

Length of Class: 1 semester, .5 credit

Course Description: The design of the English Language Learners (ELL) program is to support the academic, cultural and social emotional wellbeing of our English Language Learners (ELL). In this course, students will know how to understand and apply learning strategies with increasing proficiency for success in the general education classroom. The course also functions as a bridge for interschool relationships and social activities, as well as a platform for intercultural comparisons, critical thinking and self-advocacy development, as well as seasonal and holiday vernacular. Students will integrate background knowledge with increased English language skills resulting in a successful whole student transition to New Life Academy.
